Project: OSAHD Social Media App
We will be creating a social media app with a home page, newsfeed and a search page.
The home page will allow users to create accounts and/or sign in.
The Newsfeed and Search page will only be visible to users who are signed in. Users who are not signed in will be shown a message asking them to create an account or sign in before they can view the content.

Features:
Page 1: HomePage
-Page has a logo
-Page has content that describes what you can do on the website
-Part of the page should have background pic of people socializing

Sign In

   -Sign in Option With user account and password
   -User must sign in with a valid account to open the next page (newsfeed)

Sign Up:
   - User should be able to create an account
   - Users cannot create an account with a username that already exists.
   - Displays error message when bad input is entered (eg empty fields)
   - Fields: First Name, Last Name, Email Id, Password, Age/Gender(optional), Image(optional, About User(optional)

Footer: Sign In/Sign Up links

Page 2: News Feed Page
   - Page can only be viewed by signed in users
   - When a user who is not signed in opens this page, they will be shown a message asking them to create a new account or sign in to their account
Newsfeed:
   - Page Heading
   - Forms & Buttons to add New Pictures/Posts
   - Share posts feature.

- If a user clicks on a post that will take the user to the next page.
- If user decides to post multiple pics at one time it come on the page as flexbox or grid
- Another users can add comments on pics or other posts
- We use API's here to get live feeds or posts
- Posts have a translate button that switches the post content between English and French

Page 3: Search Page
- Search input (Swearword blocked)
- Heading
- General info
- Contact info
- Resume Link***
- Picture profile saved beside info
